

NEMA-MAX 9000

Nematode Repellent • Nano Enhanced

NEMA-MAX 9000 is a new Nano enhanced, safe, biological way to control nematodes that attack various row crops. Also, works well on Ring, Sting, Cyst, Reniform, and Rootknots as well. It will not disturb the essential soil microbes or the plant growth cycle. **NEMA-MAX 9000** is a liquid bio culture that has been shown to disrupt the root location mechanism of plant parasitic nematodes by entering the body of nematodes and altering (breaking down) the food source (protein) and destroying nymphs and larva. By reducing the rate of infection by nematodes and secondary infections by plant parasitic fungi, damage to plants is reduced significantly.

BIO MECHANICS:

Bacterium in NEMA-MAX 9000 creates specific enzymes within 24 to 48 hours after applying the product which enter through various body openings or directly through the body wall (by help of Nano drivers). They attack the protein (cell) chain and destroy the food source and starve out the host larva and nematodes.

APPLICATION RATES:

Recommended dosages are designed for heavy infestation of Nematodes. Use as directed for initial application for very first year. For the following year, cut application dosages in half (50% less) for prevention. Consult your distributor for a customized application dosage for your crops. Can be applied foliar or in furrow. Will not damage leafs, flowers, fruits, or crops. Frequent application of this product will not affect the plant growth cycle.

Caution:

Keep out of reach of children. Avoid contact with open wounds and skin; wear protective eye goggles, rubber gloves and boots.

TECHNICAL DATA:

Physical Appearance	Dark amber color
Odor	Slight fermentation odor
Specific gravity	1.1
pH	Neutral
Effective	pH Range 4 To 11.5
Effective Temperature Range	34°F - 140°F
Shelf Life	One year plus
Boiling point	Same as water
Packaging	2.5 gal, 275 gal totes

USE FOR	APPLICATION RATE PER ACRE	MIX RATIO WITH WATER	FREQUENCY
Row Crops	2 to 3 quarts	10 to 15 gal of water	2 to 3 times per season
Sugar Beets	1 to 2 quarts	10 to 15 gal of water	2 to 3 times per season
Peanuts	1 to 2 quarts	10 to 15 gal of water	1 to 2 times per season
Cotton	1 to 2 quarts	10 to 15 gal of water	1 to 2 times per season
Beans	1 to 2 quarts	10 to 15 gal of water	1 to 2 times per season
Rice & Wheat	1 to 2 quarts	10 to 15 gal of water	2 to 3 times per season
